EDUCATION

University of Western Ontario

October 2025

Master's, Software Engineering

- Member of the Skylark satellite development team, focusing on ground station system selection and implementation

Ontario Tech University

April 2023

Bachelor's, Computer Science

- Minored in Astronomy
- Specialized in Data Science with courses such as Data Mining, Database Systems and Concepts, Computer Vision, Big Data Analytics, Information Visualization, and Machine Learning

CERTIFICATIONS

CompTIA Security+ V7

PROFESSIONAL EXPERIENCE

Schneider's Computing

August 2023 - September 2024

Computer Repair Technician

Listowel, ON, Canada

- Operated the Listowel satellite store, providing customer service with a high degree of independence
- Repaired desktop and laptop computers in store with quick turnarounds, using attention to detail to minimize reoccurrences
- Assisted Internet Service Provider team in field calls and network maintenance

Ontario Tech Univeristy

January 2023 - April 2023

Teaching Assistant

Oshawa, ON, Canada

- Led 20 students through several lab activities involving Java, Glassfish backends and HTML, JavaScript frontends. Focusing on troubleshooting techniques and system integration.
- Explored file access, multithreading, network communications, and working with build tools

Food Basics

January 2014 - December 2017

Cashier and Meat Department Clerk

Listowel, ON, Canada

- Handled money, merchandise, and store cleanliness.

PROJECTS & OUTSIDE EXPERIENCE

Geo Photo Social Media App

<https://github.com/AlexNayl/GeoPhotoSocialMedia>

- A mobile app made using the flutter framework in collaboration with 3 others in a mobile development class
- It's a prototype social media site where users can post geolocated photos on a map.

Web Hosted Boid Behaviour Model Demo

<https://github.com/AlexNayl/RustBoidDemo>

- Experiment deploying a Rust powered game engine called Bevy to the internet using Web Assembly
- Demo mimics flocks of birds or schools of fish using simple movement rules.

Embedded Automatic Window Fan

<https://github.com/AlexNayl/AutomaticWindowFan>

- A DIY window fan designed to keep a room at a target temperature when outside conditions allow
- Meant to be an exploration of foundational skills for embedded systems software development.

SKILLS

General Software Development: C/C++, Python, JavaScript, Rust, Java, Version Control, Git, Agile Methodologies

Frontend Systems: Web Development, HTML/CSS, Bootstrap, Flutter, React.js, Vue.js

Data Science: Data Analysis, Computer Vision, Data Science, NumPy, Pandas, Machine Learning, Data Mining, Data Visualization, R, GGPlot, MATLAB, Keras, OpenCV

Backend Systems: Linux/Unix, REST APIs, database, SQL, Docker, Kubernetes, Google Cloud Platform, cloud technologies, API, Microservices, DevOps
